A FEW ENDORSEMENTS AND TESTIMONIALS

Soul Doctoring has already received numerous endorsements from top practitioners in the medical and healing worlds, along with a number of notable celebrities and public figures. A sample of the top endorsements includes:

“*Soul Doctoring* captures the future of medicine, in which attention to body, mind, and spirit is the hallmark. GAYLE MADELEINE RANDALL, MD brings to this book the expertise of a medical insider and a cross-cultural explorer who possesses an exquisite reverence for non-western healing traditions. This is a courageous, trail-blazing contribution.”

— Larry Dossey, MD, *New York Times* bestselling author of *One Mind*, *Healing Beyond the Body*, *Reinventing Medicine*, and *Healing Words*.

“In 2017, I found myself in a very physically compromised and frightening time of my life. I had the good fortune to meet the most gifted, kind, knowledgeable and, above all, understanding and honest doctor I have ever spoken to. Dr. Randall literally was an angel sent to me. She has taken care of and looks after my health issues with more compassion and love than I could have ever imagined! She has a true understanding, knowledge and love of the alternative healing practices which is the path I have chosen. I will forever be grateful to her and she is in my prayers everyday.”

— Olivia Hussey-Eisley, Golden Globe-award winning actress, *Romeo and Juliet*; author, *The Girl in the Window*.

“Gayle has been able to present the multiple aspects of Integrative and Functional Medicine in a semi-autobiographical and exciting way and weave them into a truly holistic manifesto. I’m not aware of another book that has been able to accomplish this task as well as *Soul Doctoring*. Going through the 26 chapters is not only a journey through Gayle’s own life, full of fascinating personal

and patient anecdotes, but a comprehensive education of the interested reader about the many dimensions of holistic health and wellness from gut to brain health, and from dreams to planetary health.

— Emeran A. Mayer, MD, *New York Times* bestselling author, *The Mind-Gut Connection: How the Hidden Conversation Within Our Bodies Impacts Our Mood, Our Choices, and Our Overall Health*; Distinguished Research Professor of Medicine, G. Oppenheimer Center for Neurobiology of Stress & Resilience

“Over the many years as I have followed Dr. Randall’s doctoring abilities, I have looked on in amazement at her healing skills. How quickly she finds solutions to patient needs and the chosen designs that she uses for her holistic approaches toward healing, as if the Universe is whispering in her ear. Is Dr. Randall’s healing knowingness a genetic gift? Who can know? Perhaps, the Great Spirit loaned her to us so she could teach us how to heal. I recommend *Soul Doctoring*. It is transformative.”

— Joseph Rael, native American Tiwa and Southern Ute, Sundance chief, teacher and author of *Healing and Vibration* and *Tracks of Dancing Light*.

“Dr. Gayle Randall is an absolute one of a kind being and soul, doing so many things for myself and my family, as well as all of mankind in general, I couldn’t be more grateful to have her in our lives really. Anyone who cares about their health and well-being, should do themselves a favor, by reading this incredible book, and make themselves aware of this brilliant and comforting woman.”

— India Eisley, Actress, *The Secret Life of the American Teenager*; star, *My Sweet Audrina*.

“Across the world, people are more aware and devoted to the body rather than to their souls. Unfortunately the awareness and knowledge about the soul is very low. One has to know about the soul before treating it. In India, we are very proud about the rich knowledge and legacy left by our ancestors for us. I am extremely happy that the world is now paying attention to this topic. Dr. Randall is actively contributing in distributing health and knowledge to people. She has the light to get the information out, and her patients are lucky to have her. I am so happy she has written *Soul Doctoring*.”

— Dr. P.N. Awasthi, Ayurvedic medicine master, founder and director, Integrative Medicine Association (in India since 1952).

“GAYLE MADELEINE RANDALL, MD is an extraordinary person who has played many roles in my life: physician, teacher, student, colleague, and friend. Her generosity in sharing her story with the world through *Soul Doctoring* is immeasurable. Read it. You'll recognize pieces of your own growth-path, and you'll be inspired to stretch to your own fullest potential. Without giving advice, she advises wisely that each of us is born to deliver a unique message of love to the world.

— Connie Kaplan, Author, *The Woman's Book of Dreams, Dreams are Letters from the Soul*, and *The Invisible Garment*.

“Gayle Madeleine Randall is generous and wise with her counsel, which begins with a distinguished background in mainstream medicine and then draws on her knowledge of the holistic and Native American traditions. I find it especially important that her philosophy on nutrition is sound and healthy, aimed at longevity and preventing or combating disease, rather than at quick and temporary weight loss. Her advice and encouragement has been invaluable to me.”

— The late Roger Ebert, author, *Ebert & Roeper at the Movies*.

“Dr. Randall has a deeper connection to the wisdom of the indigenous peoples than any doctor I've ever met and beautifully brings this together with her knowledge of integrative health and medical science. She seeks to truly understand people on the levels of mind, body, and spirit and she also has the (physical and metaphorical) medicine bag to help on all these levels.”

— Sage Dammers, co-founder Addictive Wellness.

“Medical Visionary Futurist is my description of Gayle Madeleine Randall, MD. Her wide and varied practice has led thousands to much improved and greater health. She leaves no stone unturned in her delving into the secrets of health. Gayle Madeleine Randall, MD is much to be admired as an open researcher into what is needed in human health. *To be advised by her is to be getting the very top advice in medicine today!* She is a treasure for all to enjoy and appreciate. Reading this book is an adventure of self and planetary healing led by a Medical Visionary Futurist.”

— Howard Wills, well known healer in Kauai
